Jobs Report:

Revised job figures for September released; preliminary October numbers show continued growth

INDIANAPOLIS, Ind. – Today the Indiana Department of Workforce Development released revised September and preliminary October 2004 **payroll employment figures** for the state.

Compiled in conjunction with the U.S. Bureau of Labor Statistics, payroll employment is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers. The survey is taken each month during the week of the 12th.

Looking at revised **September** figures, the state's *seasonally adjusted* numbers indicate that 2,916,300 jobs existed throughout the month, 200 fewer jobs than previously reported. With the revisions, the state actually gained 300 net new jobs from August (revised) to September (revised) and grew 13,800 more jobs when compared to September 2003.

At the same time, September's *non-seasonally adjusted* figures were revised downward by 200 jobs to reach 2,942,800 total jobs for the month. With the revision, Indiana gained 42,900 net new jobs from August (revised) to September (revised) and a total of 14,200 net new jobs since September 2003.

In the same report, preliminary data for the month of **October** was also released. The state's preliminary *seasonally adjusted* payroll employment was 2,910,700 jobs for the month. The figure marks a 5,600 job loss when compared to September, but a 9,900 net job increase from October 2003. The state's preliminary *non-seasonally adjusted* figure estimated that 2,944,00 jobs existed in October, 1,200 more jobs than existed in September and 9,900 more than existed in October 2003.

At the same time, the nation's preliminary *seasonally adjusted* payroll employment figure grew by 337,000 jobs in October to reach 132 million jobs. The country's preliminary *non-seasonally adjusted* payroll employment figure for October totaled 133.0 million jobs, up from September's 131.9 million job mark.

"The upswing we've been on for the whole year continued in October as Indiana once again improved upon 2003's performance," said Alan Degner, commissioner of the Indiana Department of Workforce Development. "And while we will continue to see month-to-month fluctuations in job growth, the overall trend remains very positive."

September Revised and October preliminary payroll employment figures/add 1

Seasonally adjusted figures:

In October, Indiana reported 2,910,700 total jobs. The number is down 5,600 jobs from September's (revised) 2,916,300 job number, but up a total of 9,900 net jobs when compared to October 2003's 2,900,800 mark.

Looking at October's preliminary seasonally adjusted numbers by **industry super-sector**, Indiana's goods-producing sector reported employment of 728,800 in October, up 600 jobs from September and 6,500 from the previous year. Of that figure, the construction sector saw employment grow by 900 jobs over the month to reach 153,100 jobs, 7,000 more than existed in October 2003. At the same time, the manufacturing sector shed 300 jobs from September to October to total 568,600 jobs, 300 fewer jobs than existed a year ago.

Indiana's service-providing sector reported employment totaling 2,181,900 in October. This figure is down 6,200 jobs from September's revised seasonally adjusted number but up 3,400 more when compared to October 2003. Of that, the professional and business service sector grew by 1,400 jobs compared to September 2003, while the leisure and hospitality sector lost 1,200 jobs over the year to reach a total of 273,200 positions in October. The state's education and health services sector reported 366,700 total jobs for the month, 4,300 more jobs than existed in the sector the same time last year.

(NOTE: ONLY LARGE INDUSTRY 'SUPERSECTORS' CAN BE DESCRIBED IN SEASONALLY ADJUSTED TERMS. FOR MORE SPECIFIC DETAIL ON INDUSTRIES, USE NON-SEASONALLY ADJUSTED NUMBERS)

Non-Seasonally adjusted figures:

In October Indiana's economy gained 1,200 net new jobs over September (revised), to reach an employment level of 2,944,000 for the month. The October preliminary non-seasonally adjusted payroll estimate shows 9,900 more jobs than compared to last year.

Using preliminary non-seasonally adjusted figures to look at the state's **industry sectors**, Indiana's goods-producing sector reported employment of 735,900 in October, down 1,200 over September, but up 6,700 jobs when compared to October 2003. Of that figure, the construction sector saw employment grow by 7,200 jobs from over the year to reach a total of 158,900 jobs.

The manufacturing sector reported 569,900 jobs in October, a decrease of 1,500 from September and 300 fewer than existed in October of last year.

Indiana's service-providing sector reported employment totaling 2,205,700 in October, up 2,400 from September and 3,200 jobs when compared to October 2003. Of that, the professional and business service sector saw no change from September's revised figures, totaling 263,100 jobs for October, 1,500 more than existed in the same time last year. The state's leisure and hospitality sector reported 275,90 total jobs in October, 1,500 fewer jobs than existed in October 2003. The government sector, which includes federal, state and local governments including schools, post offices and hospitals, added 2,200 jobs over the year to reach a total of 440,700 positions in October.

Looking at preliminary job numbers in the state's **Metropolitan Statistical Areas** (MSAs), the Bloomington area saw a net gain of 900 jobs in October as compared to a year ago to reach an employment level of 73,600. The Elkhart-Goshen MSA's October employment data showed the existence of 121,000 jobs, 700 fewer positions compared to October 2003. The Evansville area also saw a net loss of 700 jobs compared to last year, totaling 161,800 jobs for October.

At the same time, Fort Wayne's MSA reported 266,500 jobs, 1,600 more jobs compared to October 2003, while the Gary-Hammond MSA saw employment at 261,900, 1,900 fewer jobs than existed the same time last year. The Indianapolis MSA employment reached 892,200 in October, 2,600 more than existed in September, but 4,900 fewer net jobs than October 2003.

The total number of jobs in Kokomo's MSA remained unchanged over the year, at 50,000 total positions. The Lafayette MSA added 1,000 over the year to reach 97,900 total jobs, 700 more jobs than existed in September. Muncie's MSA saw 1,600 fewer jobs over the year, posting 55,100 total jobs for October. The South Bend-Mishawaka MSA added 2,300 new jobs over the year to reach 134,800 total jobs in October, while Terre Haute's MSA gained 800 jobs from October 2003 to reach 70,800 total jobs in October 2004.

Through its various programs and initiatives, the Indiana Department of Workforce Development is charged with continually improving the Hoosier workforce by assisting companies to create new jobs and improve employee skills. The agency offers a variety of training and educational grants, partners with the state's 27 WorkOne Centers, administers the unemployment insurance system, provides labor market information, assists employers with preparing workers for layoffs and, closures and operates a statewide job placement service.

For more information on Indiana's labor market, contact the Indiana Department of Workforce Development at 1-888-WorkOne, or visit the web site at www.workforce.IN.gov.

Technical Notes:

- Payroll employment is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers.
- The survey that calculates the payroll employment estimate is conducted by the U.S. Bureau of Labor Statistics and is conducted during the week of the 12th of the month.
- In calculating employment figures, two different types of calculations are provided. The first, *non-seasonally adjusted*, provides information without taking into account the effects of seasonal trends. In calculating the *seasonally adjusted* information, employment that follows more or less a regular pattern each year, including holiday or summer employment is factored out of the estimate. The adjustments make it easier to observe the cyclical and other non-seasonal movements.
- For most accurate analysis, please use revised data sets and not preliminary estimates
